

Andrej Korošec

Andrej Korošec graduated from the Faculty of Electrical Engineering and Computer Science of the University of Maribor in 1997. After graduation, he started working at the Institute of Information Science (IZUM). At first, he worked in the Computer Engineering department before joining the SICRIS Information Service unit (now Bibliographies and SICRIS) in 2000 due to his knowledge of relation databases. He has been the head developer of the SICRIS web application since 2003.

SICRIS

In May 2018, we enabled researchers to log into the SICRIS system via authorized access, based on which they can change data that was not obtained from the ARRS records (e.g. phone and fax number, web address, CERIF classification, keywords, representative bibliography, foreign language proficiency, audio-visual resources, biographical data, ORCID). In the future we wish for SICRIS to become the primary system for entering and editing all data on research activity in Slovenia. Which steps must be taken to achieve this?
