## SUBFIELDS

### 606a Entry element

The term in the form prescribed by the subject system used.

### 606x Topical subdivision

A term added to further specify the topic that the subject heading represents (see examples 2, 3, 6, 11, 12).

---

**606y Geographical subdivision**

A term to further specify a place in relation to the topic that the subject heading represents (see examples 2, 4).

---

**606z Chronological subdivision**

A term to further specify the time period in relation to the topic that the subject heading represents (see example 5).

---

**606w Form subdivision**

A term to further specify the kind or genre of the material (see examples 7, 8, 11).

---

**6062 System code**

Code of the system or subject heading list (thesaurus) from which the subject heading is derived. It is recommended that this subfield is always filled in in a field 606.

---

**6063 Authority record number**

Identification number of an authority record for a common noun (see examples 9, 10).

---

**6066 Linking data**

A two-digit number (01–99) for linking the 606 fields with the corresponding 966 fields (see example 11).

---

**6069 Previous authority record number\***

This subfield is generated automatically in the compatibility process of bibliographic and authority records that are marked to be deleted.

If field 606 is linked to such authority record, the identification number of the authority record, that is used instead of the "deleted" record, is entered automatically in subfield 3 during the compatibility process; the former content of subfield 3 is transferred into subfield 9.

## NOTES ON FIELD CONTENTS

This field contains data entered in accordance with the subject system used.

Depending on the system, this field can either be used to enter only common nouns (with authorized access points from field 250 of the COMARC/A format) or both common nouns and genre/form entities (with authorized access points from field 280 of the COMARC/A format) when used as subject headings (see example 6).
