Indicators

The meaning of the indicators in fields that are connected to the authority database is different from that in fields that are not connected with the authority database.

Indicators in fields linked to the authority database

INDICATOR	VALUE	MEANING
1		<i>Name display indicator</i>
	☐	<i>No value (displayed in personal bibliography)</i>
	2	<i>Not displayed in personal bibliography</i>
2		<i>Form of name indicator</i>
	0	<i>Name entered under forename or direct order</i>
	1	<i>Name entered under surname (family name, patronymic, etc.)</i>

The value of the indicator 1 is taken automatically from field 700. The value of the indicator 2 is taken automatically from field 400 of the authority record.

Indicators in fields not linked to the authority database

INDICATOR	VALUE	MEANING
1		
2		<i>Form of name indicator</i>

INDICATOR	VALUE	MEANING
	0	<i>Personal name or name and surname – etymological form</i>

The indicator 2 specifies the type of author's variant name entered in field 900 (see examples 6–10).

SUBFIELDS

900z Unique name form**

This subfield was used for displaying the whole reference card from field 900.

9005 Relationship control

A code is entered indicating the relationship between the variant and uniform heading (see examples 1, 2, 4, 5). The following codes are used:

e	<i>pseudonym</i>
f	<i>real name</i>
i	<i>name in religion</i>
j	<i>married name</i>
k	<i>name before marriage</i>
l	<i>shared pseudonym</i>
m	<i>secular name</i>
z	<i>other</i>

9009 Language

A code indicates the language of the variant heading base part when it is different from the language of the uniform heading base part (see examples 2, 3, 11).

Instructions described at field 700 are also valid for all other subfields (see field 700).

NOTES ON FIELD CONTENTS

If there are more variant headings, field 900 may be repeated (see examples 2, 3, 4, 6, 8, 11).
