

## A FIELDS/SUBFIELDS LIST

### Legend:

Ind.	:	Indicators (default values)
□	:	Blank, no indicator
M	:	Monographs
K	:	Continuing resources
Z	:	Collective records
A	:	Articles and other component parts
N	:	Non-book materials
-	:	Subfield is not present.
0	:	Subfield is in a sample directory.
1	:	Subfield is mandatory.
Rep.	:	Repeatability
R	:	Subfield is repeatable.
NR	:	Subfield is not repeatable.
Len.	:	Length
<sup>v</sup>	:	It is possible to enter less than prescribed number of characters.
Def.	:	Default

	Field/Subfield	Ind.	Sample					Rep.	Len.	Def.
			M	K	Z	A	N			
000	IDENTIFICATION BLOCK	□□						NR		
001	RECORD LABEL	□□						NR		
	a Record status		1	1	1	1	1	NR	1 n	
	b Type of record		1	1	1	1	1	NR	1 a <sup>1</sup>	
	c Bibliographic level		1	1	1	1	1	NR	1 m <sup>2</sup>	
	d Hierarchical level code		1	1	1	1	1	NR	1 0 <sup>3</sup>	
	e Old record number*		0	0	0	0	0	NR	20 <sup>v</sup>	
	g Encoding level		0	0	0	0	0	NR	1

	d Terms of availability and/or price		0	0	-	-	0	NR		
	z Erroneous ISBN		0	0	-	-	0	R		

<sup>1</sup> There is no default value for the record type in the input mask N.

<sup>2</sup> The default value of the bibliographic level is different in separate input masks. In input masks M and N the default value is "m", in the input mask Z it is "c" and in the input mask A the default value is "a""a".

<sup>3</sup> In input masks M, K, Z and N the default value of the hierarchical level is "0", and in the input mask A it is "2".

<sup>15</sup> In COBISS.XX systems where the authority control of personal names is implemented, only subfields 3, 4, 8 and 9 are present in input masks; the personal headings are entered with the authority database by entering the number of the authority record in subfield 7003. In COBISS.XX systems where the authority control of personal names is not implemented, all subfields (except subfields 3 and 9) are present in input masks. In records being catalogued in Serbian language uniform headings may also be present in 9XX fields, because libraires maintain catalogues in different scripts. In that case, field 700 is displayed according to the rules applied for field 900.

<sup>16</sup> Same as field 700. Subfield 6 is used in COBISS.XX systems without the authority control of personal names; in COBISS.XX systems with the authority control it appears only in old records.

<sup>17</sup> The default value of the first indicator differs in individual COBISS systems. In systems, in which they make catalogue slips, the default value is "1" – *Displayed in bibliographies and catalogues\*\**, whereas in other systems, the indicator is not defined.

<sup>18</sup> Same as field 701.

<sup>19</sup> The default value of the first indicator differs in individual COBISS systems. In systems, in which they make catalogue slips, the default value is "0" – *Displayed in bibliographies\*\**, whereas in other systems, the indicator is not defined.

<sup>20</sup> In COBISS.XX systems with the authority control of personal names there are no fields 900 in input masks; after the bibliographic record is saved, they are added automatically. In COBISS.XX systems without the authority control of personal names all subfields (except subfields 3, 5 and 9) are present in input masks.

Within the COBISS.XX systems using the display in both Cyrillic and Latin script, the display of field 900 is in Cyrillic script, if the indicator 2 is set to "1" or "4". The display should be in Latin script if the indicator is set to "0" or "3". For other values of the indicator 2 the script is defined according to the rules applied for the headings display.

<sup>21</sup> Same as field 900. Subfield 6 is used in COBISS.XX systems without the authority control of personal names; in COBISS.XX systems with the authority control it appears only in old records.

<sup>22</sup> The default value of the first indicator differs in individual COBISS systems. In systems, in which they make catalogue slips, the default value is "0" – *Displayed in bibliographies\*\**, whereas in other systems, the indicator is not defined.

<sup>27</sup> Cataloguers that have the permission to create i.e. edit authority records do not enter field 916. They edit the authority record for corporate body within the CONOR authority database.

<sup>28</sup> Within the COBISS.XX systems using the display in both Cyrillic and Latin script, the display of field 960 is in Cyrillic script, if the indicator 2 is set to "1" or "4". The display is in Latin script, if the indicator is set to "0" or "3". For other values of the indicator 2 the script is defined according to the rules applied for subject headings display.
