

**COBISS3 software****Loan updates description****V6.14-00, 9–10 December 2017**

- A new function called **Equipment loan** is included and it enables you to enter equipment data (e.g. e-readers that the library loans to its members) and to enter procedures for equipment loan.  
Please contact the NCC for the setting of the length of the accession number.
- An updated method of monitoring and processing material reservations is included.  
This function will be included into libraries in 2018.
- The option for preparing data about the settings of e-notifications that are activated for members is added. When preparing the data, the members that have an e-mail or a mobile phone number entered in the data for e-notification are taken into account. You can prepare the data in the object **Electronic notification** with the method **List of members with data for e-notifications**. During the preparation process you need to specify the location and the name of the file (file type must be *.txt*, e.g. *notification.txt*), where you will save the data. When the process is complete, a message will appear. The file contains the following data on members: membership card number, name, surname, e-mail and mobile phone number. For all possible types of e-notifications you will also see whether the member is subscribed to the notifications (value "Yes") or not (value "No"). The data is separated with the "|" character. Import it into MS Excel software, where you can edit it at will (e.g. sort them according to whether the member has an entered e-mail or not).
- In the library (department) calendar you can enter the reason why the library or its department is closed for the days that it is closed. First highlight the day when the library (department) is closed on the calendar and then enter the reason under the **Note:** option. After you confirm the day that the library is closed, the entered note is recorded for this day by clicking the **Define** or **Define all** button. You can see it in the screen tip when you are located at the specific day on the calendar. The note is deleted if you specify that the library is opened for the selected day.
- In the catalogue, the number of records corresponding to the search request is also shown in the search results next to the number of fields 996/997.
- In the libraries that use the control for renewing the loan only for material with a specific status when renewing loan with the **Renew all** option the same control will be taken into account also in changing the due date with manual entry of the date or validity period.
- The report *Lending form for newly received reservations* is updated with the report of the mobile library stop that is entered for the member.
- In the **Home library material** window the option for printing the lending form for newly received reservations for the selected entered copy. You can print it by holding down the **Alt** key and clicking the **Lending form** button. The lending form is in the A5 format. The update is being implemented for the work needs in the NUK library.

- A new subfolder *Data for further processing* is added in the reports for loan purposes with two new reports:
  - *LOAN-EXP-03: Material by transaction* that enables you to create a list of material with selected transactions for a selected period. This report is an alternative to the report *LOAN-Mt-01: Material by transaction*.
  - *LOAN-EXP-04: Members with entered material* that enables you to create a list of entered material for selected members. This report is an alternative to the report *LOAN-MM-01: Members with entered material*.

The data is created in a text file and is separated with the "|" character. When the data file is created, you save it to the appropriate location by clicking the **Save as** button in the **Overview and sending of created report** window. You can import the data into other software tools for further processing (e.g. MS Excel).
- Two new reports for loan purposes are added:
  - *LOAN-Mb-10: Notification about outstanding debts* that enables you to notify members about outstanding debts via regular mail or via e-mail. When creating the report you specify the start and end date of the period, for which the entered debts will be taken into account. The members that have an entered e-mail for e-notifications will receive the notification to their e-mail, and for other members a report will be created and sent via regular mail. The contents of the introductory text of the notification can be adapted to the needs of the library in the variable *Introductory text (LOAN-Mb-10)* (folder *Variables/Standard/Loan/Notifications sent from reports*).
  - *LOAN-Mt-05: Material statistics in mobile library* that enables you to view the current status of the material in the mobile library.
- Reports for loan purposes are updated:
  - *LOAN-Mb-08: List of members with debts*: the information about current fine in the department selected when creating the report is added (applicable to libraries with departments).
  - Query parameters "Author", "Title" and "COBISS.XX-ID" are added when creating the report *LOAN-MM-07: List of reserved material*.
  - Query parameters "Bibliographic level (001c)", "UDC for statistics (675s)" and "Intended purpose (100e)" are added when creating the report *LOAN-Mt-02: List of most requested material*.
- In the COBISS3/Reports software module the statistics subgroup *Visit* (reports from *LOAN-STA-V01* to *LOAN-STA-V07*) is removed from the reports for loan purposes (**Reports / Standard / Loan**). These statistics are replaced by statistics from *LOAN-STA-VT01* to *LOAN-STA-VT07* and visit statistics in the **Statistics (user definitions) / Visits** subfolder. These statistics use the method of calculating visits that enables libraries to be more flexible when acquiring data about the number of visits (e.g. the library can independently decide which member activities they want to include in the calculation of physical library visits).
- Bug fixes:
  - when entering the return of the last copy with entered overdue notice (method **Unavailable material / Return, delete**) the selected material is written off for the customer after you confirm the return (**Return** button);
  - the data on material from a set are written together on the lending form;
  - in searching for members with a family membership card;
  - in the **Notification** search window at the expand option after the notification status when the notification has the status "created";

- when you enter a debt settlement for a non-member, the transaction *32 – payment entry* is entered;
- when you delete an alternative number, it is not added to invalid numbers but permanently deleted;
- in calculating the number of visits in the visit statistics:
  - o if the same type of transactions were entered for a member in the same department in the period taken into account when calculating visits;
  - o if the same transaction was entered for the member within one hour in different departments;
  - o each transaction *29 – visit by non-member* is now entered as a new visit.

#### V6.13-03(05), 22 November 2017

- Bug fixes:
  - when identifying a member with the alternative number "membership card number", the member is not entered into the local database of members if there is an entry in the reference student database but not in the local database;
  - when paying a debt with eUJP the member data on fulfilling the conditions for accessing information resources are updated;
  - in loan renewal with the **Renew all** option.

#### V6.13-03(04), 20 November 2017

- Bug fix in entering the visit by a member using the method **Member / Enter visit**, when data other than membership card number is used for member identification.
- Bug fix in loan renewal for items with loan restriction in the subfield 996/997u.
- Bug fix in lending forms and invoices.

#### V6.13-03(03), 15 November 2017

- Bug fix in performing the method **Field 996/997 / Enter transaction with material in reading room**.

#### V6.13-03(02), 14 November 2017

- When registering a new member with the option of transferring data from the reference student database the option to check for duplicates is also performed in libraries that do not use the shared database of members.
- When changing the data **Type of school** the schooling data related to the value of this attribute is deleted for the member.
- Bug fixes in:
  - recording of dates in loan transaction files;
  - returning of individual issues of a serial placed in the mobile library to a department they were not borrowed from;
  - displaying information about placing the material in the mobile library;
  - considering the privileges when logging into the COBISS3 system and transitioning to individual loan departments;
  - recording cash register transactions for the purposes of non-cash debts settlements outside of the library;

- returning the material to a department it was not borrowed from without selecting a member;
- deleting invalid numbers;
- sending a notification about reservation cancellation.

#### V6.13-03(01), 30 October 2017

- Bug fix in creating overdue notices for libraries, where the restriction "Outside loan not permitted" is set for members upon receiving the highest overdue notice.

#### V6.13-03, 28–29 October 2017

- When renewing loans for material with the entered availability level (subfield 996/997p – *Availability level*), libraries can decide to consider the availability level and not the time specified for this material type in the time parameters table. To enable this option, libraries must send a request to IZUM.
- In the libraries of the Biotechnical Faculty, the "Outside loan not permitted" restriction is now shared information.
- When registering a new member with the option of transferring data from the reference student database, the option to check for duplicates on the basis of name, surname and date of birth is added. Until now, the check could only be done on the basis of user numbers.
- If the search request delivers no results when searching in the catalogue, the input focus is moved to the **Search** button.
- The search by COBISS.XX-ID in the **Unavailable material** search window is possible even if the library does not have the COBISS3/Interlibrary Loan software module included.
- Bug fix in the display of the **School name** attribute in the **Member** search engine hits.
- Bug fix in the procedure, when the material loaned to the member in the reading room is put on outside loan.
- Bug fix in quick return (**Unavailable material / Return, delete**) of serials.

#### V6.13-02, 17 October 2017

- In the **Loan** module, the **Bibliographic record** class is added, which enables setting the default search fields in the catalogue also for the employees, who only have privilege to work in the Loan module.
- When individually or batch updating member details, the option to turn off the update of the member category data is added (the data is updated on the basis of the data on the mode of study in the reference students database). To enable this option, libraries must send a request to IZUM.
- When individually or batch updating member details, the check for matching the member's name and surname in the local and reference database is no longer case sensitive.
- Bug fix in sending the notification on reservation cancellation.

#### V6.13-01, 12 October 2017

- The option to turn off software control when loaning additional copies of a monograph already on loan to the member in the same department was added. To enable this option, libraries must send a request to IZUM.
- When individually or batch updating member details (methods **Member / Update member details – student** and **Member / Update members details – students**), the e-mail address is not updated.
- The "OVR" overdue notice indicator is removed even if the last copy of a material with overdue notice is returned to a different department from the one that loaned it.
- Bug fix in reserving unavailable serial issues.
- Bug fix in debts settlement for non-members.
- Bug fix in setting the price list status.

#### V6.13-00(01), 3 October 2017

- Bug fix in reserving unavailable material through COBISS+.
- Bug fix in settling debts in libraries that only enter non-cash payments outside of the library because they are not liable to fiscal verification of invoices.

#### V6.13-00, 30 September–1. October 2017

- The following is enabled for statistics purposes:
  - User defined classifications can be created.  
In order to classify the data in the statistics you can create user defined classifications adapted to the needs of the library. You create the user defined classification by copying the system definition and by duplicating the user classification you can create any number of new classifications adapted to the needs of the library.
  - When creating statistical reports you can select another classification (system or user defined) instead of the classification set by the system.
  - In statistical reports where no activities were entered in the classification for a category the symbol "-" (hyphen) is displayed.

Working with classifications is described in the instruction [COBISS3/Reports – classifications](#) available on the *Training* portal.

Based on the needs of general libraries a new set of statistics definitions (a total of 73 statistics), which includes the above mentioned options, is created. In new statistics the requirements for additional criteria for data classifications (e.g. by library departments) were also taken into account and cash register transactions statistics were also added. You can find the definitions of new statistics in the subfolder **Reports / Standard / Loan / Statistics (user classifications)**. They are divided into four sections (subfolders). These are:

- *Members* (for creating statistics of active members),
- *Visits* (for creating statistics of visits),
- *Transactions* (for creating statistics of transactions) and
- *Cash register* (for creating statistics of cash register transactions).

All statistical reports definitions that were available until now remain unchanged and can still be used. They are saved in the **Reports / Standard / Loan / Statistics** subfolder.

Regarding the need of libraries to create statistics in .xls format (MS Excel) we would like to inform you that the reports and statistics can be converted to this format from the .pdf format if you have the appropriate version of Adobe Acrobat (e.g. Adobe Acrobat Pro DC). Adobe Acrobat software namely enables you to save the contents of the file as

an MS Excel workbook, where you can further edit the data, by selecting the option *Tools / Export PDF / Spreadsheet*.

- In the COBISS3/Repots software module the content of the subfolder with reports definitions for loan purposes (**Reports / Standard / Loan**) is rearranged. The reports definitions are saved into three subfolders. These are:
  - *Lists* (reports definitions of lists for loan purposes: *Members, Material, Members and material, Overdue notices, Cash register operations, Transactions, Routing of serials, Membership card*;  
The report *LOAN-EXP-01: List of uncollected debts* is moved to the subfolder *Overdue notices*.);
  - *Statistics* (definitions of statistical reports for loan purposes available until COBISS3, V6.12-00(10));
  - *Statistics (user classifications)* (reports definitions for loan purposes, where the use of user defined classifications is available).
- In the toolbar of the browser you can add buttons for quick access to the following class methods with the **Toolbar settings** option (right click the mouse in the toolbar): **Material / Catalogue, Member / Home library material, Member / Enter visit, Unavailable material / Return, delete, Unavailable material / Process reservations, Unavailable material / Prepare reserved material for collection and Department / Transition to another department**.
- The size of the editor windows and some editor elements can be changed by placing the cursor at the edge of the window and dragging it accordingly. In this way you can also increase the size of the **Pricelist** window, for instance.
- If the library includes the option to renew the due date in all departments where the member has entered material when renewing the loan of all material copies, the renewal option is offered only if the member has entered material at least in one other department besides the current department.
- If the library includes the option to set the restriction "Outside loan not permitted" when the member receives the last (highest) overdue notice, the option for deleting this restriction is offered when the member returns the last copy of the material with the highest overdue notice.
- The option to automatically close the **Home library material** window after printing the lending form (**Lending form** button in the **Home library material** window) is added. To activate this option the library must send a request to IZUM.
- If you wish to enter the loan of additional copies of a monograph already on loan to the member (copy of the material is from the same COBISS.SI-ID) in the same department, a message appears and the person in charge of loan must decide whether or not to loan the additional copy of the material despite that.
- The return of material in all departments is now also possible without selecting a member with the **Unavailable material / Return delete** method. In the **Home library material** window the read accession number or the loan number is transferred to the "IN/CN" field. From this point forward the return process is unchanged.
- In the case of quick member search (**Member / Search by key**), search of a member for loan (**Member / Home library material**) and when entering a member visit (**Member / Enter visit**) with the card number that belonged to the member deleted from the database and if it was selected to keep the card number unavailable, a message appears, saying the member was deleted from the database.
- In the case of returning a copy that has a status set in the holdings data (subfield *996/997q – Status*) a message about this appears.

- The list of attributes of the classes **Outside loan**, **Interdepartmental loan**, **Material routing**, **Interlibrary loan**, **Reservation of a copy**, **Reservation of material** and **Reading room loan** displayed in the browser when you select a copy is supplemented with the display of attribute values **Temporary location (e\E)**.  
This means that the attribute is also available in the *Data export software* in the related classes **Home library material** and **Returned home library material**.
- The report of data about loaned copy status (**View** button) displayed in the **Insight into the library material status** window is supplemented with the status of the copy (ST=) and temporary location (E=).
- When returning the material the title of the returned copy is also displayed in the **Home library material** window in the information about the last returned copy. If the title is too long, it is shortened with an ellipsis.
- On the slip with reservation details printed after you prepare the reserved material for collection the information in bold on whether a message on this member has been sent appears.
- When entering a debt settlement payed in cash, you need to enter the amount given to you by the library visitor in the "Cash" column. Until now the amount of the due debt was automatically entered.
- If there is no set default login department for one of the usernames in a library with departments, the user logs in to the department entered first in the local code list *Departments (CODE 301)* when logging into COBISS3.
- Supplemented and added options for libraries using RFID devices:
  - The option for checking and changing the material protection status (method **System / RFID device/protection status**). In this check window you can also check if the RFID device is working or not.
  - When returning material with the **Unavailable material / Return**, delete method the message window displays accession numbers of all available copies if copies with the status available are also read.
  - When returning material with the **Unavailable material / Return**, delete method the return process is offered and performed for all entered copies of the material if copies with the status available are also read.
- Reports for loan purposes:
  - A new report *LOAN-MM-07: List of reserved material* enables you to create a list of reserved unavailable material (status *R*) together with a list of members who reserved the material.
  - The report *LOAN-Mt-02: List of most requested material* is supplemented so that you can use a separate form *Overview of all included material* for all material items included on the list to see the collective overview of the number of loans, renewals and reservations. The form is created in a way that enables you to save it with an appropriate version of Adobe Acrobat (e.g. Adobe Acrobat Pro DC) as an MS Excel workbook where you can further edit the data.
  - The report *LOAN-STA-Mt03: By type of material (physical form)/months* – in classifying data by physical form the contents of the subfield *001b – type of record* are taken into account.
- Bug fix in the reservations of bound issues of serials for the reading room.
- Bug fix in printing the slip with the reservation data in the case of returning reserved material.

- Bug fix in charging the costs of overdue notices in libraries where the cost of the new overdue notice covers the cost of the previous overdue notice: this also happens if the member already received an overdue notice for the same material.
- Bug fix in the inclusion of a new loan department: a cash register for this department is also created.
- Conditions for the due date renewal at the self-checkout and the automated phone service are equalized with the conditions for the due date renewal with My library service.
- Bug fix regarding the calculation of the number of visits: in the case of entering transactions in loan for the previous period, the entered transactions are considered as a new visit from a member when calculating the number of visits.
- Bug fix: expired reservations can be deleted with the basic privilege for working in loan (LOAN\_BASIC).

#### **V6.12-00(10), 7 September 2017**

- In the e-mail received by the member when they perform a payment in My library the title of the notification is changed, printing of data about the library and the date of payment is added, the printing of the text *This is an automatically generated message ...* is removed.

#### **V6.12-00(09), 28 August 2017**

- Bug fix regarding the deletion of expired reservations.
- Overdue notice:
  - bug fix regarding the display of the overdue notice recipient address if the postal address for overdue notices was changed
  - bug fix regarding the sending of the notification about forthcoming overdue notice

#### **V6.12-00(08), 23 August 2017**

- Bug fix regarding the checking of the reservation existence in the department that made the reservation (when reserving and when returning through self-checkout).
- Bug fix regarding the creation of overdue notice for material on loan (reading room) –the overdue notice is not created if the expiry date has not yet expired.
- Bug fix regarding the cancellation of a debt entry for an uncollected reserved material when batch deleting expired reservations.
- Bug fix regarding the duplicate of a postcode for foreign citizens in the *Registration form* report.
- Bug fixes concerning conditions for remote access and the preparation of the file with member details for the needs of the National and University Library (NUK).

#### **V6.12-00(07), 17 August 2017**

- Updates concerning the preparation of the file with member details for the needs of the National and University Library (NUK).

#### **V6.12-00(06), 9 August 2017**

- In COBISS+ and COBISS/OPAC the reservation of material that is on loan indefinitely is disabled.
- The option of using the user report definition instead of the standard definition.
- Updating the conditions for remote access for the needs of the National and University Library (NUK).
- Adding the option of preparing the file with member details for the needs of the National and University Library (NUK).

#### V6.12-00(05), 15.–16. July 2017

- Bug fixes regarding routing lists:
  - as long as the status of the routing list is "valid", the material is on loan and it is not possible to change the holdings status;
  - for routing lists, the status "valid" can be changed only when none of the relevant issues is on loan.

#### V6.12-00(04), 8.–9. July 2017

- Bug fix regarding the control of signing the registration statement.
- Bug fix regarding the privileges for issuing an invoice copy (now basic privileges for working with the cash register suffice).
- Bug fix in the display of the reservations processing period in the LOAN-MM-01 report.
- In the catalogue it is possible again to use arrow keys to move in the search results list.

#### V6.12-00(03), 3 July 2017

- The display of the alternative number (student number or user number) is now included in the member data within the report LOAN-Mb-08.
- Shared database of members: control of data entry for member categories updated, where it is no longer mandatory to enter the date of birth.
- The width of the data that appears on the lending form for newly received reservations changed.

#### V6.12-00(02), 27–28 June 2017

- Bug fix regarding the loan period renewal for material with an entered overdue notice.

#### V6.12-00(01), 20 June 2017

- Bug fix regarding the return of material using the **Unavailable material / Return, delete** method.

#### V6.12-00, 17–18 June 2017

- Searching in the **Keywords** field was updated in the search window of the **Member** class. It is now possible to search by the attributes **Name**, **Surname**, **Guardian/guarantor name** and **Notes**:

- When entering search requests you can use diacritics or omit them (enter e.g. soncek or šonček); the search results are the same in both cases.
- Word search was added (you can enter any punctuation mark or a space between two or more words; when searching, the words will be taken into account without any punctuation marks).
- It is possible to truncate a search term or phrase using the "\*" sign (asterisk), which replaces any number of characters. The truncation sign can only be used at the end.
- When entering a search request, you can use small or capital letters; the search result is the same.
- The default logical operation between words in the search request is AND (the search results must contain all words from the search phrase).
- In libraries with activated use of RFID readers, the **Scan RFID** button was added for the purposes of scanning material when searching by key in the **Field 996/997** class and the **Unavailable material** class and for the methods **Unavailable material / Prepare reserved material for collection** and **Field 996/997 / Enter transaction with material in reading room**.
- In libraries that use RFID devices, their use can be activated in selected library departments only.
- The "Employment" search field was added in the search window of the **Member** class.
- Two additional search fields were added to the search window of the **Entered debts** class: "Services/debts" (enables searching debts by description) and "Type of service/debts" (enables selecting the debt type from the code list).
- The "Membership card number" search field was added in the search window of the **Invoice** class.
- Two additional search fields were added to the search window of the **Transactions** class: "Mobile library stop" and "Department".
- The **Material loan analysis** method was added in the **Unavailable material** class. It enables the preparation of data on the loan of monographs for titles, the copies of which are stored at the library; not included are copies with the status "*de-accessioned*". The following transactions are taken into account as loan: outside loan, reading room loan, reading room transaction, loan period renewal, change of return date, loan period renewal by phone, My library renewal and interlibrary loan. After you select the method, enter the time period, for which you wish to perform the analysis. In the case of libraries with departments, you can select on or more departments, the material of which you wish to include in the analysis. Once the parameters are defined, the software requests the file location and name (the file type must be *.txt*, e.g. *department01.txt*) for the file in which you will save the data. Once the analysis procedure is finished, a message will be displayed. The file contains the following data on the material: record COBISS.SI-ID, title, author, accession date (for the first copy), accession numbers of individual copies of each title, call number (of the first copy) and number of loans. The data is then exported to MS Excel where you can sort it any way you like (e.g. by number of loans) and analyse it even further. By sorting the data by number of loans you will receive data on the number of titles with the most loans, but also data on titles that were not put on loan. The data on the number of loans is displayed by department for all copies of each title together.
- It is now possible to return material that was put on loan in another department to the mobile library without previously entering the transfer of this material to the mobile library.

- Once you process a reservation (**Unavailable material / Process reservations** method), the notification about the task with the information about where the report about the processed newly received reservations is stored is no longer sent to the e-mail address of the person who processed the reservation.
- The library can decide to include contents of the global list to an individual local code list (e.g. the contents of the global code list for the attribute *University in eVŠ* to the *Institutions, companies* code list). The transfer of the global code list contents to the local code list can be performed at IZUM upon the library's request.
- When renewing the loan period, for material with availability levels, for which unconditional or restricted loan is defined, the loan period is renewed for the time specified for each type of material in the time parameters table. The loan restrictions applicable to material without an availability level are also taken into account.
- The call number was added to the display of holdings data in loan (**View** button) that is displayed in the **Insight into the library material status** window.
- Access to the e-documents archive is now enabled also for usernames with basic privileges for working in loan.
- The option of de-activating the printout of a catalogue card with data on the reservation of material in the process of preparing reserved material for collection was added. To activate this parameter, the library must send a request to IZUM.
- Bug fixes regarding the display of search results when searching in the **Catalogue**:
  - in expert search, the selected department is taken into account in libraries with departments,
  - sorting volumes of serials from most recent to oldest also in the case when the search results include monographs and serials.
- On lending notes, invoices, credit notes and cancellations of invoices the library name and department name are now displayed in bold.
- On lending notes and invoices, the library can now display the lender's numeric identifier (the unique identifier of the username) instead of the lender's name and surname. To do this, replace the variable *lender's name and surname* with the value *lender's numeric identifier* for the type of data 4. *Additional data on the lending form and invoice*. The numeric identifier is added to the **User** class attributes. The table of usernames with corresponding numeric identifiers is prepared on the *Training* portal (Users' list (tax numbers)).
- Bug fix regarding the addressing of overdue notices for underage library members.
- Bug fix regarding the display of the copy status and the reservation options in departments with non-automated loan.
- Bug fix regarding invoice cancellations for non-members.
- Reports for loan purposes:
  - The new report *LOAN-Mb-09: Active members* enables the creation of a list of active members in a selected time period. In the **Transactions** search window, specify the parameters for including members in the list of active members (time period, one or more transactions, member category, transaction department, etc.). It is also recommended to enter the "Comment in the title" parameter before creating the report. In the report, for each active member the data on the membership card number, name, surname, category, address and date of entry will be displayed. If some of the active members had already been deleted from the database, the display of data on these members is no longer possible; the information about the number of such members will be displayed at the end of the report.

- The new report *LOAN-CRO-04: Overview of payments (invoices, credit notes, cancellations)* enables the preparation of overviews of issued invoices, credit notes and invoice cancellations.
- The report *LOAN-Mb-02* was renamed to *Members by date of last visit* (previously: *Active members*) as it only includes members whose last visit was recorded within the time period entered when creating the report. This is why the parameter "Period" was renamed to "Date of last visit".
- The report *LOAN-Mb-06* was renamed to *Members by date of last visit/by departments*, as it enables the creation of lists of members whose last visit was recorded within the time period and in the selected department. This is why the parameter "Period" was renamed to "Date of last visit".
- When creating the report *LOAN-Mb-08: List of members with debts*, the search parameters "Services/debts" (enables searching for debts by description) and "Type of service/debts" (enables selecting the type of debt from the code list) were added.
- When creating the report *LOAN-TR-04: List of cash register transactions*, the search parameters "Payment method" and "Type of non-cash payment" were added. The order of the search parameters was changed. The report was updated with the display of the data on the type of payment and the type of non-cash payment, the order of the attributes was changed, the data in the list is sorted by date and time of transaction.
- When creating reports that enable the selection of members in the **Member** editor, the option was added for searching in the search fields of the **Member**, **Postal address**, **Telephone**, **E-mail**, **Alternative/invalid numbers**, **Privileges** and **Restrictions** tabs.
- In the reports *LOAN-TR-01: Transactions for member – membership card No.* and *LOAN-TR-02: Transactions for member – ID No.*, the display of the internal invoice number was removed. For the purposes of overviewing the payments for a selected member, create the new report *LOAN-CRO-04: Overview of payments (invoices, credit notes, cancellations)*.

#### V6.11-03, 20–21 May 2017

- Opening of the cash register drawer without debts settlement is enabled. For this purpose, the library using the cash register drawer can use the **Cash register balance / Open the cash register drawer** method in the *Debts settlement and entry* folder.
- Bug fix in creating overdue notices regarding the grace period in the case of workdays.
- Report *LOAN-EXP-01: List of uncollected debts*
  - The display of discount amount per copy added.
  - The error that occurred when fewer than four overdue notices were sent to members by the library corrected.
- Bug fix in entering transactions in the case of individual or batch deletion of members.

#### V6.11-02, 10 May 2017

- When manually entering debts for the member, the option of searching by the item description in the price list was added. For this purpose the search buttons ( for **Find** and  for **Find next**) were added in the **Debts entry – select service/debts** window.
- Bug fix regarding the preparation of overdue notices for material on reading room loan (status S).

**V6.11-01, 3 May 2017**

- Bug fix regarding the preparation of overdue notices in XML format.

**V6.11-00(01), 19 April 2017**

- When changing the member's membership card number the option was added to delete the old (invalid) membership card number.
- A bug fix was made regarding the preparation of overdue notices in the format *I – A4 format/address right*.
- A bug fix was made regarding the control of availability for loan for routing material (status *K*).
- The error that occurred when deleting a member whose membership card number was changed previously was corrected.

**V6.11-00, 15–17 April 2017**

- For the purposes of monitoring the success of e-notification, the attributes **Notification status**, **Time and date of notification status** and **Events with notification** were added in the **Notification** class. It is also possible to search by the first two added attributes. Detailed information on the sending of notifications is available in the **Notification** editor if you click the **Events with notification** button.
- The option was added that, when preparing reserved material for collection (**Unavailable material / Prepare reserved material for collection** method), the member is not sent an e-notification about the received reserved material even though the member is subscribed to e-notifications. For this purpose, the checkbox "Member to be notified." was added in the **Prepare reserved material for collection** window, where you untick the box if you already arranged with the member when the material will be ready to collect. The default value is that the member will be notified. If you decide not to notify the member that the material is ready for collection when processing the reservation, the value *NO (upon library's decision)* will be displayed in the *Notification sent* column.
- The display of the copy status (996/997q) (e.g. *relocated*) was added on the delivery note that is displayed when processing newly received reservations.
- The option was added to enter the return of material with restriction for copies on interdepartmental loan, which is why the **Retain** button in the **Home library material** window is active. By doing so, loan and reservations of material that is still on its way to the host department are disabled.
- Upon the library's request, IZUM can activate parameters that enable the following:
  - specifying the category of members for which the entry of the date of birth is mandatory;
  - specifying the category of members, for which the entry of the guardian/guarantor's name is mandatory;
  - the option of making the entry of the member's gender mandatory; the setting is only applicable to some member categories;
  - the option of making the entry of the municipality of permanent residence mandatory; the setting is only applicable to some member categories;
  - the option of setting departments in which it is required to check if the registration form was signed;

- the option of setting departments in which a loan restriction for the last issue of a serial applies;
- The option of setting departments in which library members can reserve material with restricted availability via COBISS/OPAC.
- The option was added to prepare forms for overdue notices in XML format (setting in the *Format and address position* column). The prepared overdue notices on these forms can be saved as XML files in the **Overview and sending of created reports** window, which enables the distribution of overdue notices to library members via special notification distribution providers.
- For e-notifications for users (e.g. e-notification about a forthcoming loan period expiry date) the option was added to enter a special e-mail address to which users can send any questions. The attribute **E-mail address for reply (e-notifications)** can be entered for the home library (**Home library / Contact details and information for COBISS/OPAC** method) but also for an individual department if these e-mail addresses differ based on the department. If the e-mail address is the same for all departments it can be entered for the home library only.

**Note:** The entered e-mail address entered for the user variable **E-mail address for reply (e-notifications)** will no longer be relevant, which means that you have to edit the e-mail addresses on the first workday after installing the software.
- In the calendar window the designation and name of department will be displayed in the title bar (applicable to libraries with departments).
- In the calendar you can specify the days when the library or its department is closed, but they are still considered when calculating the fine. These days can be set by selecting "*fine is calculated*" from the drop-down list in the option "*Type of day when the library is closed*". You then select one or more days in the calendar and click the **Set** button. These days are marked with a blue border in the calendar. By default, the days when the library is closed are not considered when calculating the fine (they are marked with a red border).
- For the **Member / Entering/settling debts** method the note entered when entering the debt is also displayed in the list of entered debts for the member and in the overview of transactions. When using the **View settled debts** method the note that was entered when entering the settled debts for the purposes of being displayed on the invoice will be displayed.
- If the library uses the option that the loan period is renewed in all other departments when renewing the loan period for all copies, the data on the department, author and title is displayed for every copy for which the loan period was renewed.
- When entering data on education it is possible to also enter uncoded data for the attributes **University, School name** and **Course of study**. Use this option when you wish to enter data on students studying abroad.
- When returning borrowed material to the reading room (status *S*) a warning was added that the material that is on loan in the reading room can be reserved for reading room use (status *U*). The condition is that the validity period for reading room reservations is entered (column "*read*").
- When processing reservations the window for previewing the list of cancelled reservations will open.
- In the note on material for loan (**Field 996/997 / Enter note for loan** method or double-click on the second row of the *Sts/O* column in the **Home library material** window) it is possible to enter up to 450 characters.

- When batch deleting inactive members, two separate lists are prepared: *List of inactive members that will not be deleted due to notes* and *List of inactive members that will not be deleted due to entered material and/or debts*.
- In the reports *LOAN-CRO-32: List of invoices (closing out cash register)*, *LOAN-CRO-01: List of invoices*, *LOAN-CRO-02: List of invoices incl. VAT* and *LOAN-CRO-03: Summary of list of invoices incl. VAT*, the data on the range of included invoice numbers was added to the document head.
- In statistics *LOAN-STA-A01: By member category (school libraries)*, *LOAN-STA-A02: By member category*, *LOAN-STA-A03: By municipality/member category* and *LOAN-STA-A04: By mobile library stops/member category* a warning was included regarding taking into account active members in the interim displays and total number of active members.
- In statistics of the group *Loan of material* (from *LOAN-STA-Mt01* to *LOAN-STA-Mt12*) the value 26 – *renewal via telephone* was added to the default transactions.
- In statistics where data is listed by municipality (*LOAN-STA-T03: By municipality/member category*, *LOAN-STA-V05: By municipality/member category*, *LOAN-STA-VT05: By municipality/member category (transactions)* and *LOAN-STA-A03: By municipality/member category*) the name of the municipality is displayed next to the code.
- In the reports *LOAN-TR-01: Transactions for member – membership card No.* and *LOAN-TR-02: Transactions for member - ID No.*, the invoice number under which the invoice is recorded in the database is displayed.
- In the report *LOAN-EXP-01: List of uncollected debts* the total amount of unsettled debts for the member is displayed at the end of the list. Once the data is imported to an Excel file the data is sorted by membership card number.
- The data on the area of expertise and the selected reading room is also entered in the member data in the transaction file, if this data is entered for the member (for the purposes of libraries within the COBISS.BG system).
- In libraries that use a joint members' database, the member's date of birth is also checked when checking for duplicates.
- A bug fix was made related to the name of files with stored credit notes, if several credit notes and their copies were made for the same invoice.
- An option for disabling transactions with sets is added to the self-checkout settings (if the self-checkout does not support sets).

#### **V6.10-03, 25–26 March 2017**

- Based on the decision of the Information Commissioner as of 27 February 2017 (No.: 0612-16/2017/8) all e-notifications that are sent to library members by e-mail were changed in the COBISS3/Reports software module so that the received e-mail does not contain any personal details of the member (e.g. *Notification about received reserved material*, *Notification about a forthcoming loan period expiry date*, *LOAN-MM-05: Notification about a loan period expiry date (e-mail)*, etc.).
- The library address is changed in all e-notifications for libraries with a superior partner. The address is now created based only on the home library data and not on the superior partner data.
- The report *List of invoices (LOAN-CRO-32)* was updated with the display of the VAT base and VAT in the summary tables by service type and VAT rate.
- If the member has blocked the receipt of SMS-notifications, this is visible as follows:

- the reason is listed in the **Member** editor under the restriction "SMS-notifications blocked with operator";
- the abbreviation *SMS* is displayed next to the "Restrictions" attribute and the restrictions in the related objects;
- the information about the blockade is listed in the **Home library material** window in the restrictions.

The additional search field "SMS-notifications blocked with operator" was added in the **Member** editor in the **Restrictions** tab for the purposes of searching the reasons for the blockade.

- Bug fix regarding the e-notification about forthcoming overdue notice.
- Bug fix regarding the preparation of lists when batch deleting inactive members in libraries with several departments.
- Bug fix regarding entering settled debts from the group *99 – OTH other*.
- Bug fix regarding the number of days overdue in the **Home library material** window.

#### V6.10-02(02), 13 March 2017

- Bug fix regarding the creation of lending forms for newly received reservations.

#### V6.10-02(01), 8 March 2017

- Data entry was corrected for e-notification in the **Member** editor.
- Member entry was corrected for members from the students database for KISUM libraries.
- Labels for membership cards can now also be printed on labels sized 50 x 25 mm.

#### V6.10-02, 1 March 2017

- The logical destinations *Invoice – Loan* and *Lending form for reservation – Loan* were added. This enables that libraries can set up a different number of copies of these reports for lending forms, invoices and reservations slips (lending form for newly received reservations and slip with reservation details). The new logical destinations are set up in the same way as it applies for the logical destination *Lending form – Loan*.

**NOTE:** Once the software update is installed, before starting to work in loan both new logical destinations must be set up, otherwise the invoices, lending forms for newly received reservations and slips with reservation details will not be printed.

- If the library does not use the certified cash register, once a debt is settled, the option of previewing the invoice content will open. The library can then decide whether or not the invoice will be printed.
- The following options are arranged for lending forms for newly received reservations:
  - they are arranged by call number,
  - the additional name of the home library is also displayed,
  - the attribute values are displayed in bold (instead of the attribute names),
  - within the COBISS.BG system the reading room, to which the reserved material must be delivered, is also displayed.
- The error that occurred when entering members from the reference students database was corrected (applicable to libraries in KISUM).

- The error that occurred when allocating the material to the member was corrected (if upon the deletion of the status *O* or *W* (transaction *17*) the material is allocated to the next member with a reservation, this allocation is entered as transaction *15*).

#### V6.10-01, 18–19 February 2017

- If the reference students database does not contain the data on the mode of study, the member category *004 – students (full-time)* is defined when entering a member with the transfer of data from this database.
- The error that occurred when closing a larger number of cash registers at the same time was corrected.
- The code lists *Area of expertise (CODE 325)* and *Reading room (CODE 326)* were added to the local code lists for the purposes of libraries within the COBISS.BG system.

#### V6.10-00(02), 1 February 2017

- The error that occurred while checking membership validity when entering loan procedures in retrospect was corrected.
- The error that occurred in relation to blocking reservations in COBISS/OPAC and COBISS+ for reading room material with the status *6 – damaged* was corrected.

#### V6.10-00(01), 30-31 January 2017

- The error that occurred when identifying members on devices that operate via SIP2 was corrected.

#### V6.10-00, 28–29 January 2017

- **Entering the net price per unit to the nearest ten-thousandth**  
In the price list in the **Services/debts – group** editor when entering the price per unit it is possible to enter the price rounded off to the nearest ten-thousandth (up to the fourth decimal place). This means that libraries that charge VAT for certain services/goods enter the price excluding VAT (**Price per unit** attribute) so that once the VAT is calculated, the price including VAT (**Amount** attribute) is the same as the price in the official library price list.  
When charging for services and goods, in accordance with the rules for rounding off prices for all calculations up until the final amount that the library member must pay for the services/goods, all sub-total amounts are calculated based on the net prices rounded off to the nearest ten-thousandth. The invoices, credit notes and invoice cancellations include the price, value of goods/services, calculated VAT, payable amount and return amount rounded off to the nearest hundredth.  
**NOTE:** All libraries liable to pay VAT **must**, after installing the new version of COBISS3 software, check the items on the price list, for which VAT is calculated, and correct the net price (**Price per unit** attribute) so that the price including VAT (**Amount** attribute) will be the same as the price in the official library price list. Otherwise it might happen that the price incl. VAT may be different to the price in the official price list.
- **Entering debts after switching to entering net prices rounded off to the nearest ten-thousandth**

For all already entered debts, the amount to be settled will be calculated based on the net price that was valid when the debt was entered, and will be rounded off to the nearest ten-thousandth.

- **Printing invoices, invoice cancellations and credit notes for libraries liable to pay VAT**

On the reports of invoices, invoice cancellations and credit notes the price of goods/services is displayed as the price incl. VAT; the total value of goods and services is also displayed as the amount incl. VAT.

- **Information about member debts**

In the My library service on the lending form, notification about outstanding debts and overdue notices (if the information about unsettled debts is displayed on the lending form and/or overdue notice in the library), the displayed debts of the member towards the library are rounded off to the nearest hundredth.

- **Warning about entered debts for services/goods for which VAT is calculated**

If the member has entered debts for services/goods for which VAT is calculated, a warning is displayed when switching to the **Home library window**. An invoice for such services/goods must be issued at the end of the VAT end period.

- **Reports related to cash register transactions**

In the following reports, the prices are displayed without VAT, prices including VAT, value of services/goods, VAT base and calculated VAT rounded off to the nearest hundredth, based on the price/value, rounded off to the nearest ten-thousandth:

- *Price list*
- *List of cash register transactions*
- *List of invoices (closing out cash register)*
- *I-BP-01: List of invoices*
- *I-BP-02: List of invoices incl. VAT*
- *I-BP-03: Summary of list of invoices incl. VAT*
- *I-C-08: List of members with debts*
- *I-TR-04: List of cash register transactions*
- *in the data export for the purposes of FURS (the files REPORT INVOICES HEADERS.TXT and REPORT INVOICES ITEMS.TXT)*

- **Saving invoices, invoice cancellations, credit notes and copies of these documents in PDF format**

When printing an invoice, invoice cancellation, credit note or copies of these documents, each document is saved automatically in PDF format. This enables subsequent printing of documents for internal use and issuing copies in the same form and with the same contents as the original. In the archive of each document, all related documents are available as well (e.g. the original invoice is available in the credit note archive). The documents are available via the **Archive** object method, which can be found for the objects **Invoice** and **Credit note**.

- **Creating copies of invoices, invoice cancellations and credit notes**

Copies of invoices, invoice cancellations and credit notes are now created based on the documents saved in the archive in PDF format. The copy of an invoice and copy of an invoice cancellation are still created using the **Invoice / Create copy** object method; whereas the copy of a credit note is created using the **Credit note / Create copy** object method.

- **Removing some methods related to printing invoices, invoice cancellations, credit notes and copies of these documents**

Archiving issued invoices, invoice cancellations and credit notes in PDF format enable the creation of copies and re-printing these documents based on the archived original, which is why the options **Invoice** and **Cancellation of invoice** were removed from the object methods **Invoice / Print** and **Invoice / Send**, whereas the **Credit note** option was removed from the object methods **Credit note / Print** and **Credit note / Send**.

In the COBISS3/Reports module it is no longer possible to print out an invoice, invoice cancellation, credit note and the copies of these documents.

- **Archiving already issued invoices, invoice cancellations, credit notes and copies of these reports in PDF format**

When installing the new version of the COBISS3 V6.10-00 software all issued invoices, invoice cancellations, credit notes and copies of all these documents will be archived in PDF format. The content of these reports will be the same as if these documents were newly created in the COBISS3 V6.9-00 software), but without the data on the entered material and the entered debts. Copies of these documents are created based on the archived documents by using the **Invoice / Create copy** method and the **Credit note / Create copy** method.

- **Credit note cancellation disabled**

A software control was added that disables the cancellation of a credit note.

- **Cancellation of invoices, not issued on the current day, disabled**

It is only possible to cancel settled debts on the current day.

**Tip:** To avoid subsequent error detection when settling debts, it is recommended to check the balance of the cash register daily and to use the method for closing out the daily cash register.

- **POS terminal**

For cash register operations for the purposes of non-cash debts settlements, it is now possible to use the NLB (Nova Ljubljanska banka, d. d., Ljubljana) POS terminal. Upon the library's request, IZUM can turn on a special parameter for using the POS terminal. The POS terminal settings are defined with the **System / Settings / POS terminal** method.

- **Updating the list of attributes of the »Member« class**

In the list of attributes that are displayed in the browser when selecting the member, the values of the following attributes will be displayed from now on: **E-mail address for e-notifications**, **University**, **Name of school**, **Level of study**, **University in eVŠ**, **Study programme in eVŠ**, **Level of education** and **Mobile library stop**. These attributes will also be available in the *Data export tool* in the **Member** class.

- **Update of searching in the catalogue**

Searching in the catalogue has been updated so that records for e-books are now also included in the search results. For libraries with departments, searching e-books is only included if you search in all departments, which is why you have to select the option »all departments« from the drop-down list of departments.

- **Setting up search fields in the catalogue**

When searching the catalogue you can now set up the search fields you use for searching most frequently. To set up the search fields for the **Field 996/997** tab, select the desired search fields in the search window of the **Field 996/997** class and save them by clicking **Save query**. To set up the search fields in the **Bibliographic record** tab, set up the search fields in the same way in the search window of the **Bibliographic record** class.

- **Loan status report**

Loan status report has been changed, so that when you search in all departments for department copies without automated loan no COBISS/Loan is displayed. The same applies for loan status report in COBISS/OPAC and COBISS+.

- **Warning when deleting a reservation**

A warning has been added when deleting a reservation in the **Home library material** window. The person at the lending desk must confirm that the reservation should be deleted. The warning is displayed when deleting reservations of available or unavailable material (status *O* and *R*) and of material waiting for the member (status *W*).

- **Loan period for reading room loan for material, reserved in the reading room**

When borrowing material for reading room loan, for material that was previously reserved for the member for reading room loan (status *U*) the current date is set as the due date for reading room loan. As a rule, material can only be on reading room loan for one day which means that the due date is the same as the loan date. Until now the due date was the same as the reservation expiry date.

- **Printing membership cards**

It is now possible to print on plastic cards to make membership cards using the Zenius printer (by Evolis). It is possible to print the name, surname, membership card number and barcode. The name and surname can be printed in small or capital letters, or some data can be excluded from the printout. For the purposes of printing membership cards the new logical destination *Card - Loan (member)* was added. Before you start using the printer the logical destination must be edited by adding the appropriate driver for the Zenius printer and then selecting graphic printing and landscape in the details. The card is printed from the workspace by using the **Member / Print** or **Member / Send** method and selecting the report definition **Card for membership card**. If a library decides to start printing membership cards, an installation request must be sent to IZUM (defining and positioning the data that should be included on the card).

- **Individual membership fee – taking into account workdays**

When defining the membership validity (**Membership validity** attribute) you can limit the duration of the membership validity in days so that only workdays are taken into account. In this case you have to enter the \* sign in front of the membership validity duration in the values within the local code list Membership fee type – individual (CODE 318). For example: If you offer a membership of three workdays, enter the membership validity as follows: *06 – three-day membership#\*3d*.

The workdays will be taken into account as listed in the library's calendar; if the department has a separate calendar, the department calendar will be taken into account instead.

- **Loan statistics**

- For loan statistics, the names of the statistical reports have been shortened as the type of statistics is visible from the name of the groups of statistics in each folder or subfolder.
- In the group of statistics *LOAN-STA-OT ... – Visit by transactions* the way of counting visits of members who were active via the My library service, has been changed.
- For statistical reports *Visit by transactions* (statistics *LOAN-STA-VT01* to *LOAN-STA-VT07*) the transaction *52 – change of data via COBISS/OPAC* is only taken into account if you are preparing a statistical report for all departments (i.e. if the parameter "Library department" is not specified). The change of data via COBISS/OPAC is not bound to a specific library department.

- **Overdue notices, e-notification of members**

The mode for creating and deleting overdue notices as well as e-notifications for members is adapted to processing large amounts of data.

- **Slip with reservation details**

The second name of the home library is added, the order of the "Validity" and "Reserved" attributes was changed, the attribute values (instead of the attribute names) are displayed in bold.

**V6.9-00(04), 28 January 2017**

- archiving issued invoices, invoice cancellations, credit notes and their copies

**V6.9-00(03), 14 January 2017**

- archiving issued invoices, invoice cancellations, credit notes and their copies

**V6.9-00(02), 7–8 January 2017**

- return of several routing issues at the same time, because the routing status was changed to *closed* only for the last selected issue, disabled

**V6.9-00, 14–15 December 2016**

- content of the message that is displayed on the self-checkout when borrowing material, already entered for another member, was updated

**V6.8-00(05), 19–20 November 2016**

- error that occurred when entering the reason for writing off debts corrected

**V6.8-00(04), 9–10 November 2016**

- error in operation of Omega signature pad corrected
- In the case of subsequent sending of e-notifications, in the notification about forthcoming overdue notice, only the material will be displayed in the list that was entered for the member at the time of the repeat e-notification.
- error that occurred when displaying the library address on overdue notices – multi-layer carbon-copy envelopes corrected

**V6.8-00(03), 27 October 2016**

- error that occurred when returning material on interdepartmental loan based on the entry of the accession number corrected
- error that occurred when addressing overdue notices in libraries with departments corrected

**V6.8-00(02), 12–13 October 2016**

- error that occurred during self-checkout procedures corrected
- error that occurred when checking reservations while renewing loan periods corrected

**V6.8-00(01), 8–9 October 2016**

- notifying members about membership expiry now possible also on the membership expiry date

**V6.8-00, 4–5 October 2016**

- The options of signing documents on a signature pad and electronic saving of registration forms have been included.

The new **Registration form** button was added to the **Member** editor and is used to start preparing the registration form. The data is copied from the data entered in the **Member** editor to the registration form. Before the library member signs the registration form by means of the signature pad (**Sign document** method on the prepared registration form), he/she can check the content of the registration form. If necessary, the registration form can also be printed (**Overview and sending of created report** option). Once the member signs the registration form and confirms the signature, the registration form is saved electronically.

For each member, all signed registration forms are saved and can be viewed and printed by using the **Member / E-documents archive** method. The saved registration forms are deleted automatically when the member is deleted (individual deletion or batch deletion of inactive members). The name, statements and notes on the registration form can be adapted by the library with standard definitions.

The COBISS software supports the Omega signature pad by Signotec.

- In the **Member** editor under the **General** tab the new **Citizenship** attribute was added for entering the member's citizenship. The alternative identification numbers (**Alternative ident. numbers** tab) have been updated with new rows, i.e. personal identification number, Urbana card number, MSISDN mobile phone number and old membership card.
- Before switching to the **Home library material** window a message is displayed for the member with the set restriction "Outside loan not permitted".
- When using the methods **Member / Edit**, **Member / Home library material** and **Unavailable material / Return, delete**, a message is displayed when the member turns 18 and has a guardian/guarantor. Once you click the **OK** button, you can continue with your work. If necessary, you can edit the data on the address for receiving overdue notices in the member data.
- When the library member turns 18, the overdue notice is addressed to the name and surname of the member and not the guardian/guarantor regardless of the settings. This does not apply to members in the category *013 – foreign nationals*, where the overdue notices are always addressed in accordance with the settings for the member.
- It is now possible to activate the opening of the cash register drawer even in a library where different printers are used in individual departments.
- The city and date on the lending form are now displayed in a smaller font size.
- Overdue notices:
  - The overdue notice text is displayed in another font and a larger font size (previously Times New Roman 10, now Arial 11). This change does not apply to overdue notices printed on multi-layer carbon-copy envelopes, as the shape of these envelopes does not allow for changing the space for printing data
  - The accession number of the copy for which the member received the overdue notice is now also displayed among the material data.

- It is possible to include the library's logo to the overdue notice header. If a library would like to do so, they must send their logo, defined as an image, saved in .jpg or .gif format with the maximum size of 25 x 176mm, to the NCC's e-mail address. By default, the overdue notices are printed without the logo.
- It is possible to add a picture of the signature of the person, responsible at the library, under the type of data 6 (*Signature on overdue notices*). If a library would like to do so, they must send the responsible person's signature, defined as an image, saved in .jpg or .gif format with the maximum size of 25 x 80mm, to the NCC's e-mail address. By default, the overdue notices are printed without the signature.
- Overdue notices, issued to library members in the category *125 – legal entities, external institutions*, are now addressed to the name of the superior member/partner, and no longer to the name and surname of the member who deals with library business on behalf of the legal entity. As a result, overdue notices are not counted as personal mail of the employee of the superior partner/member.
- On reports that the library issues and/or sends to its members (lending forms, invoices, cancellations of invoices, credit notes, A4 overdue notices), the display of data on the document issuer has been standardised (library/department address).
- In the process of preparing lending forms and invoices the name of the data was changed from "1. Department under library name" to "1. Data on department/additional data", as editing this type of data provides new options for setting the address for both libraries with departments and libraries without departments.
- On invoices and lending notes that the library issues to members in the category *125 – legal entities, external institutions*, the data on the name and surname of the person who uses library services on behalf of a legal entity or an external institution is no longer displayed. Only data on the legal entity or the external institution will be displayed (name, head office address, tax number and/or VAT ID no.).
- On lending forms for material with the status *lost*, the date when the status validity expires is now displayed (instead of the date when the copy was marked as lost). The name of the column where this date is displayed was changed from "lost/type" to "valid to/type".
- In the price list (**Services/debts – group** editor) it is now possible to enter piece and hour as units of measure.
- When creating the reports *LOAN-TR-04: List of cash register transactions* the search parameter "Member ID" was removed. The contents of the report were updated with the display of the data on the membership card number. The report will also contain an updated with a summary display of cash register transactions by username and type of cash register transaction.
- In accordance with the [Rules amending the Rules on the requirements regarding software and electronic devices, on the management and operation of information systems and on the content, form, method and time limits for the submission of data \(Official Gazette RS, No. 18/16\)](#) the display of data on invoices for cash transactions was changed, i.e. the files REPORT INVOICES HEADERS.TXT and REPORT INVOICES ITEMS.TXT. The data for both files can be prepared by using the **Invoice / Display data on issued invoices (REPORT INVOICES HEADERS.TXT)** method or the **Invoice / Display data on issued invoices (REPORT INVOICES ITEMS.TXT)** method and is no longer prepared in the COBISS3/Reports software module.
- The error that occurred when lending material in the host department if there were reservations in the parent department is now fixed.

- The error that occurred when sorting material on the lending form so that the material with an older expiration date is on the top of the lending form is now fixed.
- The error that it was not possible to enter the transfer from the mobile library for the material that became unavailable for loan is now fixed.
- The error that it was possible to reserve material for the department in the host department is now fixed.

#### V6.7-01, 9.– 10. July 2016

- The "Mobile library stop" search field is added in the **Member** search window.

#### V6.7-00, 25 –26 June 2016

- The display of library material data that appears in the **Insight into the library material status** window is updated. Now the following details are displayed for monographs: author, title, publication year and language of publication, whereas the following details are displayed for serials: title, ISSN number, language of publication and publisher.
- The member receives an overdue notice on the day that follows the loan period expiry date for the material placed on loan in reading room (status S) and not returned on the same day. In relation to all further overdue notices, grace periods specified with loan-related time parameters are observed.
- In the library you can now define the e-mail address where copies of e-notifications are to be sent. Use the **Home library / Contact details and information for COBISS/OPAC** method; the window will open, where you can enter the relevant e-mail address under "E-mail for copies of e-notif.". If the library has departments and you wish that copies for an individual department are sent to a separate e-mail address (not the one defined with the method **Home library / Contact details and information for COBISS/OPAC**), enter the e-mail address in the **Department** editor, under "E-mail for copies of e-notif."
- In relation to limiting the number of copies placed on outside loan, it is now possible to determine the maximum number of items placed on outside loan, regardless of the type of library material. Enter this number by using the **Home library / Restrictions on operations** method; enter it under *Restricted number of copies on loan – outside loan*, under »max. total number«. If restrictions concerning the maximum number of items that can be placed on outside loan for individual types of library material are specified, they are taken into consideration, too. In such a case, the member can borrow the maximum number of items of an individual type of library material, whereas the total number of items placed on loan may not exceed the number, specified as the maximum total number.
