REQUEST FOR SAMPLE COPIES	
Dear Madam/Sir,	Ljubljana, 26.3.2002
the Central Technological Library, University in Ljubljana, Slovenia, covers all fields of science and technology (except medicine).	
Due to our restricted budget we have to substitute old or choose new titles very carefully and a sample copy in hand is one of the best recommendations and a possibility to inspect the journal.	
As it is I am above all interested in all new journals from science and technology, so would it be possible to put me on a sample copy mail list for all new titles?	
As our library forms a sample copies" collection (data available online for all Slovene users and samples on loan for inspection) my interest is also for older titles not owned by our library and/or any Slovene library.	
If the order for the journal subscription is to follow, it is due in autumn (August and September is the time to check our funds and decide on subscriptions).	
For the present I would like to get a sample copy of the titles listed below or in case samples are not available a remark when they would be available e.g. if not to be had, the reason why, to be able to amend our records and not ask for sample again.	
Thanks in advance and kind regards,	
Lidija Vodopivec (Miss) CTK Serials Department
