COBISS3 Software
Version V6.1-00, October 2014

Description of new features in
the COBISS3/Serials software module

In the COBISS3/Serials software module, Version 6.1-00, the following feature has been included:

1. Order report and claim for undelievered issues report

On both types of reports, a department that receives the copy can be displayed instead of the department where the copy will be located. This type of report is enabled by a special parameter in the configuration file. The recipient department ID must be entered into the appropriate subfield *997n – Note* in the following format: *< recipient_department_ID >*.
