COBISS3 Software
Version V6.4-00, December 2015

Description of new features in the COBISS3/Application Administration software module

In the COBISS3/Application Administration software module, version V6.4-00, the following feature has been included:

1. Entering home library data

In libraries where parameters for fiscal cash registers are included in the configuration file, you can enter also the data on business premises in the **Home library / Details** editor.

2. Downloading data from the database of members

In libraries that use the COBISS3/Loan software module, a member's membership card number, the institution number or its acronym will not be transferred to the partner data (to "Symbol") when downloading data from the database of members.
