COBISS3/ Application Administration
Version 6.2-01, April 2015

List of changes No. 15, April 2015

Title of manual part	*Page with change*	*Type of change*
Title page	Title page/1–2	updated
CONTENTS	CONTENTS/1–2	updated
2.1 Entering home library data	2.1/13–18	updated, added (chapter 2.1.5.3)

Notes:

With regards to publishing changes in the manuals, the following rules apply: in the part, listed in the "Title of manual part" column, a new date must be entered in the footer on all the pages. The vertical lines next to the previous changes must be deleted. New vertical lines must be added next to the new changes. Text that was moved further down on the page or onto the next page due to changes made on the previous page must not be marked with a vertical line.

Listed under "Page with change" are all pages on which the content was changed compared to the previous printed version of the manual, i.e. new changes included in the text, deleted chapters, added chapters or moved text. For the purposes of updating double-sided printed manuals, the pages (odd and even) are listed, where the contents have not changed, but the only change made was the entry of a new date in the footer.

To update the printed version of the manual, print the "Set for printed version" file and replace the pages in the binder. The "Set for printed version" contains all the pages listed in the "Page with change" column. If you wish that the contents of the binder are the same as the "Complete manual" file, then you have to print out the complete parts listed in the "Title of manual part" column.

COBISS3/Application Administration
Version V6.2-01, April 2015

Descpription of new features No. 15, April 2015

Below is a description of the main updates of the contents by the parts, listed in the "List of changes" in the "Title of manual part" column.

1. 2.1 Entering home library data

2.1.5 Entering data for updating the COLIB database

The chapter was changed and updated due to entering new data for the needs of the mCOBISS application, which is saved in the COLIB database (i.e. the library's contact details or data on the library's lending departments if loan in the library is organized by departments).

As methods for sorting library departments and data on the library's opening times in the COLIB record were replaced by a new method, using which you can sort lending departments for the needs of mCOBISS application (in a library where loan is organized by departments) as well as sorting the data mentioned above, the previous subchapters with description of procedures for sorting library departments and data on the library's opening times in the COLIB record were combined in a new chapter where a procedure for sorting all three types of data is described.
