COBISS3/Application Administration
Version V6.4-00, December 2015

List of changes No. 16, December 2015

Title of manual part	Page with change	Type of change
Title page	Title page/1–2	updated
CONTENTS	CONTENTS/1–2	updated
2 HOME LIBRARY	2/1	updated
2.1 Entering home library data	2.1/1–19	updated
3.1 Entering partner data	3.1/3–6	updated
Publisher data		updated

Note:

With regards to publishing changes in the manuals, the following rules apply: in the part, listed in the "Title of manual part" column, a new date must be entered in the footer on all the pages. The vertical lines next to the previous changes must be deleted. New vertical lines must be added next to the new changes. Text that was moved further down on the page or onto the next page due to changes made on the previous page must not be marked with a vertical line.

Listed under "Page with change" are all pages on which the content was changed compared to the previous printed version of the manual, i.e. new changes included in the text, deleted chapters, added chapters or moved text. For the purposes of updating double-sided printed manuals, the pages (odd and even) are listed, where the contents have not changed, but the only change made was the entry of a new date in the footer.

To update the printed version of the manual, print the "Set for printed version" file and replace the pages in the binder. The "Set for printed version" contains all the pages listed in the "Page with change" column. If you wish that the contents of the binder are the same as the "Complete manual" file, then you have to print out the complete parts listed in the "Title of manual part" column.

COBISS3/Application Administration
Version V6.2-01, April 2015

Descpription of new features No. 15, April 2015

Below is a description of the main updates of the contents by the parts, listed in the "List of changes" in the "Title of manual part" column.

1. 3.1 Entering partner data

3.1.1.2 Downloading data from the database of members

The chapter was changed because in libraries that use the COPBISS3/Loan software module, when downloading data from the database of members, the member's membership number, the institution number or its acronym will no longer be transferred to partner data (to »Symbol«).
