

COBISS Lib application

Description of updates in the Acquisitions module

V15.0, 25–26 May 2024

- When adding and deleting rows in the copies table, the added row or the row above the deleted row remains displayed (previously the first row in the table).
- When preparing claims for legal deposit copies, it is possible to enter the period according to the entry date of the item for the list of legal deposit material and enter the time when the procedure should be carried out.
- Bug fixes:
 - when sending an order via e-mail,
 - when canceling an order item, if the procedure is carried out for several items,
 - when updating data on funds after opening a fund and after transferring means between funds,
 - when updating data on fields 996/997 when making up sets in the acquisition procedure.

V14.0.3, 09 March 2024

- Bug fix:
 - when entering a rounding-off with a minus sign in the invoice.

V14.0.1, 17 February 2024

- When editing data in the drop-down lists in the copies table, the changed value remains displayed (previously the first value in the list).
- When entering the price, the value *0.00* is highlighted and does not need to be deleted.

V13.0.8, 11 November 2023

- Bug fix:
 - when splitting a delivery note into two delivery notes.

V13.0.7, 26 October 2023

- Bug fix:
 - when saving the readings when checking the legal deposit delivery.

V13.0.5, 12 October 2023

- It is possible to search by items when checking the legal deposit delivery.
- Bug fix:
 - for the order of printing reports on the distribution of copies by departments for the selected items of acquisition documents.

V13.0.3, 2 October 2023

- In the EDI-order, for the order items, the display of the note from the data "A note included in order" was activated.
- In the legal deposit receipt confirmation, the note is not displayed if it has a value between 1 and 16.
- Bug fixes:
 - when exporting an invoice into the accounting system,
 - when searching for a partner by designation,
 - when saving the readings when checking the legal deposit delivery.
